

DANIEL FEBRIAN EKA WIJAYA

Fullstack Software Engineer

Surakarta, Indonesia • danielfebrian61@gmail.com • linkedin.com/in/danielfebrianew • github.com/danielfebrianew • danielfebrian.online

SUMMARY

Fullstack Software Engineer with production experience building end-to-end web applications across multiple tech stacks (Spring Boot, NestJS, Go Echo, Next.js). Shipped 4 production applications in under a year — from government performance systems to AI-powered video platforms. Fast learner: Spring Boot in 8 weeks, Go in 7 weeks. Fluent in raw SQL for MySQL & PostgreSQL. Experienced with VPS deployment using Docker Compose.

TECHNICAL SKILLS

Backend	NestJS (TypeORM, Prisma ORM), Spring Boot (JDBC Template, JPA), Go (sqlx)
Frontend	Next.js (App Router, SSR/SSG), React, Tailwind CSS
Database	MySQL, PostgreSQL — raw queries, query optimization, schema design
Cloud	AWS S3, Google Cloud Platform (GCP)
DevOps	Docker Compose, VPS deployment
Other	Flutter (mobile), Electron (desktop), Wails (desktop)

WORK EXPERIENCE

CV Artha Growth – Madiun, Indonesia Nov 2025 – Present

Fullstack Software Engineer (Freelance)

CV Artha Growth

Spring Boot, Go Echo, Next.js, MySQL, PostgreSQL

- **Pohon Kinerja:** Designed a hierarchical KPI tracking system for 200+ government employees, with optimized raw SQL via JDBC Template to avoid N+1 problems on deeply nested data. Role-based access across 5 levels (super admin, admin, ASN lvl 1–3).
- **E-Kinerja (Jira-like PM Tool):** Built in Go Echo with 4-role system, client request pipeline, task assignment, and multi-step verification workflow — adopted by 3 engineering teams. Sprint velocity improved 30% in first quarter of use. Includes real-time task updates via Server-Sent Events.
- **Manajemen Risiko:** Built end-to-end risk & fraud management platform for local government using Spring Boot + JPA with session-based auth. Covers full risk lifecycle (objectives → identification → analysis → treatment → monitoring), multi-level performance scoring (individual, agency, regional), and dedicated fraud risk module for government compliance. Next.js 16 frontend with React 19 and Tailwind CSS v4.

Koperasi Jasa Cipta Damai Makmur – Remote Dec 2025 – Feb 2026

Fullstack Software Engineer (Freelance)

Koperasi Jasa Cipta Damai Makmur

NestJS, TypeORM, Next.js, MySQL

- **NovusNext Gen:** Led a team of 3 to build an AI-powered platform that transforms product images into promotional videos — reducing production time from 4 hours to 8 minutes.
- Orchestrated 4 AI APIs in a single pipeline: Seedance (image→video), fal.ai FFmpeg (stitching), OpenAI ChatGPT (script generation), and Google Gemini (TTS) — with error handling and retry logic.
- Built credit-based billing system with virtual account top-up, transaction history, and admin dashboard; integrated AWS S3 for media storage and Gemini API for AI-generated product banners.

Freelance Project – Remote Jan 2026 – Mar 2026

Fullstack Software Engineer

Independent

NestJS, TypeORM, Next.js, MySQL

- **Arisan Platform:** Built an end-to-end arisan management platform with payment integration, JWT auth with refresh token rotation, automated round-draw algorithm with audit log, and admin dashboard for 30+ users. Mobile-first Next.js UI designed for non-technical users.

Freelance Project – Remote Mar 2026 – Jul 2026

Fullstack Software Engineer

Independent

Golang, Wails, React, FastAPI, SQLite

- **Auto Clipper:** Built a desktop app that automates the full pipeline of turning long-form YouTube videos into short, ready-to-post vertical clips — from downloading and transcription to AI-driven moment selection, speaker-tracking reframe, subtitle burn-in, and final render.
- Built a Wails desktop application with Go backend orchestration and React + TypeScript frontend.
- Integrated Gemini API for intelligent clip range selection, YOLOv8 for face detection, and faster-whisper for transcription — all coordinated through the embedded Python FastAPI service.

EDUCATION

UPN "Veteran" Yogyakarta – Yogyakarta, Indonesia 2020 – 2025

Bachelor of Informatics, GPA 3.78 / 4.00

- Head of Talent Management Department at UKM Seni — Band Subunit (2 years), responsible for recruiting, developing, and managing talent across the organization.
- Demonstrated fast learning and consistency, graduating with strong academic performance alongside active freelance work.

CERTIFICATION

Bangkit Academy by Google, GoTo, Traveloka – Remote Jan 2024 – Jun 2024

MBKM Program — Cloud Computing Path

- Completed an intensive 6-month cloud computing program under Google, GoTo, and Traveloka — covering GCP infrastructure, cloud-native development, and real-world capstone projects.
